DETAILED ACTION

Receipt is acknowledged of the amendment filed 11/25/2008.

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

The rejections under 35 USC 112, first and second paragraphs are withdrawn in view of applicant's amendments.

The following is a new rejection of the claims made in view of applicant's amendments:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 8-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant appears to be claiming polysilazane coating on a base which may contain calcium particles of some type. The intended use of "apatite forming ability" does not lend the claim patentability. Further the claims are indefinite in that although a composition is set out, they are written almost in "product by process" style. For example, the simulated body fluid is not part of the composition per se. Immersion in claims 11 and 12 do not change the composition. The coating fluid step seems to set out a method of forming the film on a base. Applicant is requested to more particularly set out the claims so that it is clear whether a composition or product by process is being claimed. Further, if a composition is claimed, the film composition should be set out for its polysilazane content and the inclusion of calcium particles, Not just a calcium compound.

WO/2004/039904 IS CITED FOR ITS TEACHING OF A POLYSILAZANE COATING.
